BLUE TEAM ALPHA

Banking Services

Cybersecurity Solutions You Can Bank On

The security experts at Blue Team Alpha are experienced in addressing the complex and highly regulated demands of financial institutions. We have 25+ years of experience implementing stringent IT standards for banks and credit unions.

Penetration Testing

By partnering with Blue Team Alpha, you can find detailed information on actual, exploitable security threats. Our security experts test your network and applications for vulnerabilities, exploit them, and provide documentation and recommendations to **shore-up your defenses.**

Vulnerability Testing Services

Banks can't defend against an attack if they don't know the vulnerabilities within the organization. Our tests allow banks to **proactively identify vulnerabilities** and determine which are most critical, which are less significant, and which are false positives.

Social Engineering

Leverage our experience to put your bank to the test in a controlled environment. Our assessments come with a final report card, recommendations, and best practice tips any bank can quickly act on to **lower your level of susceptibility to phishing and other social engineering tactics.**

vCISO Services

Proper cybersecurity requires more than the implementation of security tools and techniques. Our Virtual Chief Information Security Officer services bring the business acumen and expertise to take a strategic approach to cybersecurity. We will work closely with your organization to craft and execute an **effective and comprehensive cybersecurity strategy and policy.**

Security Awareness Training

Our Security Awareness Training aims to **equip bank employees with the knowledge** to identify phishing and social engineering campaigns, as well as how to avoid the common pitfalls of hacker traps. Our training programs are fully compliant with Gramm-Leach-Bliley Act (GLBA), GDPR, Sarbanes Oxley, PCI-DSS, and all other information security standards to ensure your banking team is up to speed with your industry's requirements and best practices.

Blue Team Alpha is the **exclusive Cybersecurity Partner** of UBB

Banking Services Cont.

Ransomware Readiness Assessment

The Ransomware Readiness Assessment determines **how ready you are to prevent and defend against a ransomware attack.** We will help your organization identify your most critical business services and assess your business's ability to quickly detect an attack, contain the damage to your critical systems, and highlight where to focus resources regarding backup and restoration capabilities.

Compromise Assessment

The Compromise Assessment service from Blue Team Alpha assesses your environment for Indicators of Compromise. The main purpose and goal of the assessment service is to **identify if there has been a breach of your system.** If our team discovers there has been a breach, we can act rapidly and seamlessly transition over to our Incident Management service.

Incident Preparation and Management

Blue Team Alpha can provide **expert-level guidance before, during and after** a cybersecurity incident.

AlphaProactive, our incident management retainer, will make sure your bank has an elite team of incident response experts on standby so you can respond faster to an attack. Our seasoned experts become familiar with your network and will help **reduce the business impact** of a cyberattack.

Our managed triage and incident management service, AlphaDefend, prepares your bank for when a cybersecurity incident occurs. The AlphaDefend program reduces incident response times, lowers costs, and gives you the tools and knowledge to **strengthen your overall security effectiveness** when handling a cyberattack.

And lastly, if you do experience a cyber incident, Blue Team Alpha will have you covered with AlphaResponse, our immediate incident management service. Our team of certified security professionals will rapidly assess your breach situation, deploy the best countermeasures to minimize the damage, and get your systems and business operations back to normal so you can **get back to business.**
