

UNET.web & WireXchange®

Simple, Secure and Efficient Wire Transfers

United Bankers' Bank (UBB) and Fiserv have created a solution for new or existing Fiserv WireXchange customers who want the ability to process and settle their wire transfers through UBB.

UBB's Online Banking service, UNET.web provides community banks with access to their transaction and account information quickly and securely, allowing them to manage their cash and daily operations more efficiently and effectively.

WireXchange is a browser-based solution featuring one-time wire entry to streamline every step in the wire transfer process, including verification, Office of Foreign Assets Control (OFAC) screening, posting to your host system, delivery to UBB and automated notification to your customers.

Combining the security and efficiencies of these two platforms provides customers with complete wire transfer automation that is simple, secure and efficient.

Simple

The easy-to-use UNET.web and WireXchange interfaces reduce training and setup time.

Secure

UNET.web provides secure access through biometric fingerprint authentication. WireXchange uses SSL Internet data encryption to ensure integrity and confidentiality of financial information.

Efficient

Reduce errors and eliminate redundant and manual processes with one-step wire entry that includes:

- OFAC validation
- Wire verification dual control
- Posting to the account processing system
- Wire transmission to UBB
- Funds settlement to your UBB DDA Account
- Automated notifications to your customers

Key Benefits

- Streamlines every step in the wire transfer process
- Integration with domestic and international wire platforms
- Settlement and posting of wire files directly to your customer and your UBB account
- Ensures security and confidentiality of financial information
- Reduces errors and eliminates redundant and manual steps
- Adapts to your unique environment
- Helps you meet regulatory requirements

The Right Solution

Take advantage of a complete end-to-end solution that streamlines wire processes, settlement and reduces operational costs.
